

Recipe for Exquisite DISH-Mo:

- Step 1. Add one \$31 billion German-backed mobile company
- Step 2. Add one \$33 billion satellite company with 80 MHz of warehoused spectrum (hold the customers)
- Step 3. With the FCC's approval, combine into one GIANT company
- Step 4. Garnish with 30 MHz spectrum set aside
- Step 5. Add additional 10 MHz to the set aside if Step 4 does not quench greed

Voila – a taxpayer-funded multinational corporate behemoth with a leg up on the competition
